

### Worksheet 3: Experiment design

Start with a description of the study you will replicate:

Experiment title:	
The goal of the experiment:	
Methodology used:	

Then think about how are you going to conduct your own experiment:

Research participants	
Recruitment to the research:	
Profile of research participants:	
Research design	
Variables: (dependent / independent)	
Materials/tools needed to conduct the experiment:	
Procedure	
Procedure description:	
Explanation on method selection:	
Study limitations:	
How did you solved the ethical issues?	
Differences compared to the original study	
Innovations:	
Challenges:	

Before starting your research project, ask your teacher / lecturer for advice.
